BACE Self-Contained Compactor SC35

The BACE SC series of self-contained compactors is the answer to your wet-refuse requirements. The BACE SC units are ideal for grocery markets, malls, movie theaters, restaurants, hospitals, food processing plants, and retail super centers that process or produce excessive wet waste and/or want to create an organics program. The Waste Flush Sump System with Waste Flow Design offers a 1050-gallon liquid sump reservoir underneath and behind the compaction ram. This putrescible waste is compacted to be emptied at the your local landfill. The unique BACE “T” seal around the door is a specially designed composite that ensures a liquid-tight, self-cleaning seal. For those who want to maximize hauling weight and reduce hauling fees, please inquire about our Patented Weight Based IntelliPACT™ System.
